Fees determined using the construction cost index method (CCIM), utilize the affected building gross area, and a permit fee multiplier (.003 as established by the Trumbull County Commissioners). The CCIM uses a nationally recognized square foot construction costs schedule (Residential). Both may be adjusted annually if needed and implemented on January 1st of each year. The following formula shall be used when fees are calculated using the CCIM (Does not include plan review or processing fees). Affecte Gross Building Area X Square Foot construction Costs X Permit Fee Multiplier = Fee
